

About

This app uses a **BERT-based AI model** to detect emotions in text.

🎯 How it works:

- 1. Enter any text in the input box
- 2. Click the "Analyze Emotions" button
- 3. See detected emotions with confidence scores

💡 Tips:

- Try different types of text
- Be creative with your inputs
- Check the emojis for visual feedback

📖 Emotions detected:

The model can detect 27 different emotions including joy, sadness, anger, love, and many more!

Text Emotion Analysis

Enter your text here:

I miss my best friend so much since they moved away.

Analyze Emotions

Detected Emotions:

Sadness

71.3%

Found 1 emotion(s) in your text!
