

About

This app uses a **BERT-based AI model** to detect emotions in text.

🎯 How it works:

1. Enter any text in the input box
2. Click the "Analyze Emotions" button
3. See detected emotions with confidence scores

💡 Tips:

- Try different types of text
- Be creative with your inputs
- Check the emojis for visual feedback

📖 Emotions detected:

The model can detect 27 different emotions including joy, sadness, anger, love, and many more!

Text Emotion Analysis

Enter your text here:

Wait, what do you mean by that? I don't quite understand.

Analyze Emotions

Detected Emotions:

Confusion

70.8%

Found 1 emotion(s) in your text!
